# BOTTLE CAP RECYCLING

## Why have we introduced the bottle top scheme?

This scheme was introduced to our school to teach you about the importance (and fun) of helping to save the planet by recycling!

When plastics end up in our ocean or landfills, they damage the planet and harm animals. This is why it is good to litter pick and stop using plastics that cant be recycled.

# STEP 1

Your job is to collect as many bottle caps as you can! You can collect caps from home, from litter picking, or from wherever else you may find them!

# STEP 2

Bring your collected bottle caps to school and put them in the recycling collection box! MYGroup will collect the box and take it to their recycling site...

# STEP 3

MYGroup shred the bottle caps into small pieces, which then get melted into big boards.

The boards then get transformed into cool new 100% recycled products!

# STEP 4

EARTH TOKEN

**1 KILO BOTTLE CAPS** = **250 EARTH TOKENS** = **100% RECYCLED PRODUCTS**

When we collect 1 kilo of bottle caps, we earn 250 Earth Tokens, which are collected and traded in for products of our choice from MYGroup!

# WHAT CAN GO INTO THE BOX?

Please make sure you only put PLASTIC bottle caps into the recycling collection boxes!

NO METAL, it hurts the recycling machines

# PRODUCTS WE CAN GET
