

# Number: Addition and Subtraction with Reasoning

VOCABULARY					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Near double Halve Equals, is the same as (including equals sign) Difference between How many more to make..? How many more is...than..? How much more is..? How many fewer is...than..? How much less is..? Number bonds Fact families One more, ten more	Make, sum, total Fact families Number facts One hundred more, one hundred less Tens boundary	Column addition and subtraction Hundreds boundary	Inverse	Efficient written method Ones boundary Tenths boundary	Order of operations
NUMBER BONDS					
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
represent and use number bonds and related subtraction facts within 20	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
<b>Continue the pattern</b> $10 + 8 = 18$ $11 + 7 = 18$ Can you make up a similar pattern for the number 17? How would this pattern look if it included subtraction?	<b>Continue the pattern</b> $90 = 100 - 10$ $80 = 100 - 20$ Can you make up a similar pattern starting with the numbers 74, 26 and 100?  <b>Missing numbers</b> $91 + \square = 100$				

## Number: Addition and Subtraction with Reasoning

<p><b>Missing numbers</b>  <math>9 + \square = 10</math>  <math>10 - \square = 9</math></p> <p>What number goes in the missing box?</p>	<p><math>100 - \square = 89</math></p> <p>What number goes in the missing box?</p>				
---	--	--	--	--	--

MENTAL CALCULATION					
<p>add and subtract one-digit and two-digit numbers to 20, including zero</p>	<p>add and subtract numbers using concrete objects, pictorial representations, and mentally, including:</p> <ul style="list-style-type: none"> <li>* a two-digit number and ones</li> <li>* a two-digit number and tens</li> <li>* two two-digit numbers</li> <li>* adding three one-digit numbers</li> </ul>	<p>add and subtract numbers mentally, including:</p> <ul style="list-style-type: none"> <li>* a three-digit number and ones</li> <li>* a three-digit number and tens</li> <li>* a three-digit number and hundreds</li> </ul>		<p>add and subtract numbers mentally with increasingly large numbers</p>	<p>perform mental calculations, including with mixed operations and large numbers</p>
<p><b>Working backwards</b>            Through practical games on number tracks and lines ask questions such as “where have you landed?” and “what numbers would you need to throw to land on other given numbers?”</p> <p><b>What do you notice?</b></p>	<p><b>True or false?</b>            Are these number sentences true or false?  <math>73 + 40 = 113</math>  <math>98 - 18 = 70</math>  <math>46 + 77 = 123</math>  <math>92 - 67 = 35</math>            Give your reasons.</p> <p><b>Hard and easy questions</b>            Which questions are easy /</p>	<p><b>True or false?</b>            Are these number sentences true or false?  <math>597 + 7 = 614</math>  <math>804 - 70 = 744</math>  <math>768 + 140 = 908</math>            Give your reasons.</p> <p><b>Hard and easy questions</b>            Which questions are</p>	<p><b>True or false?</b>            Are these number sentences true or false?  <math>6.7 + 0.4 = 6.11</math>  <math>8.1 - 0.9 = 7.2</math>            Give your reasons.</p> <p><b>Hard and easy questions</b>            Which questions are easy / hard?</p>	<p><b>True or false?</b>            Are these number sentences true or false?  <math>6.17 + 0.4 = 6.57</math>  <math>8.12 - 0.9 = 8.3</math>            Give your reasons.</p> <p><b>Hard and easy questions</b>            Which questions are easy / hard?</p>	<p><b>True or false?</b>            Are these number sentences true or false?  <math>6.32 + \square = 8</math>  <math>\square = 1.68</math>            Give your reasons.</p> <p><b>Hard and easy questions</b>            Which questions are easy /</p>

## Number: Addition and Subtraction with Reasoning

<p> <math>11 - 1 = 10</math>  <math>11 - 10 = 1</math>            Can you make up some other number sentences like this involving 3 different numbers?         </p>	<p>           hard?  <math>23 + 10 =</math>  <math>93 + 10 =</math>  <math>54 + 9 =</math>  <math>54 + 1 =</math>            Explain why you think the hard questions are hard?         </p> <p> <b>Other possibilities</b>  <math>\square + \square + \square = 14</math>            What single digit numbers could go in the boxes? How many different ways can you do this?         </p>	<p>           easy / hard?  <math>323 + 10 =</math>  <math>393 + 10 =</math>  <math>454 - 100 =</math>  <math>954 - 120 =</math>            Explain why you think the hard questions are hard?         </p>	<p> <math>13323 - 70 =</math>  <math>12893 + 300 =</math>  <math>19354 - 500 =</math>  <math>19954 + 100 =</math>            Explain why you think the hard questions are hard?         </p>	<p> <math>213323 - 70 =</math>  <math>512893 + 300 =</math>  <math>819354 - 500 =</math>  <math>319954 + 100 =</math>            Explain why you think the hard questions are hard?         </p>	<p>           hard?  <math>213323 - 70 =</math>  <math>512893 + 37 =</math>  <math>8193.54 - 5.9 =</math>            Explain why you think the hard questions are hard?         </p>
<p>           read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Written Methods)         </p>	<p>           show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot         </p>				<p>           use their knowledge of the order of operations to carry out calculations involving the four operations         </p>

# Number: Addition and Subtraction with Reasoning

<p><b>Fact families</b> Which four number sentences link these numbers? 12, 15, 3</p> <p><b>What else do you know?</b> If you know this: <math>12 - 9 = 3</math> what other facts do you know?</p> <p><b>Missing symbols</b> Write the missing symbols (+ - =) in these number sentences: 17 <input type="text"/> 3 <input type="text"/> 20 18 <input type="text"/> 20 <input type="text"/> 2</p>	<p><b>Fact families</b> Which four number sentences link these numbers? 100, 67, 33</p> <p><b>What else do you know?</b> If you know this: <math>87 = 100 - 13</math> what other facts do you know?</p> <p><b>Missing symbols</b> Write the missing symbols (+ - =) in these number sentences: 80 <input type="text"/> 20 <input type="text"/> 100 100 <input type="text"/> 70 <input type="text"/> 30 87 <input type="text"/> 13 <input type="text"/> 100</p>				<p><b>Missing symbols</b> Write the missing signs (+ - x ÷) in this number sentence: <math>6 \text{ } 12.3 = 61.9 \text{ } 11.9</math></p> <p><b>What else do you know?</b> If you know this: <math>86.7 + 13.3 = 100</math> what other facts do you know?</p>
---	--	--	--	--	--

# Number: Addition and Subtraction with Reasoning

WRITTEN METHODS					
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Mental Calculation)		add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	
<b>Convince me</b> In my head I have two odd numbers with a difference of 2. What could they be? Convince me  <b>Missing numbers</b> Fill in the missing numbers (using a range of practical resources to support) $12 + \square = 19$ $20 - \square = 3$	<b>Convince me</b> What digits could go in the boxes? $7 \square - 2 \square = 46$ Try to find all of the possible answers. How do you know you have got them all? Convince me	<b>Convince me</b> $\square \square + \square \square + \square \square$ The total is 201 Each missing digit is either a 9 or a 1. Write in the missing digits. Is there only one way of doing this or lots of ways? Convince me	<b>Convince me</b> $\square \square \square - 666 = 8 \square 5$ What is the largest possible number that will go in the rectangular box? What is the smallest? Convince me	<b>Convince me</b> $\square \square \square + 1475 = 6 \square 24$ What numbers go in the boxes? What different answers are there? Convince me	<b>Convince me</b> Three four digit numbers total 12435. What could they be? Convince me

## Number: Addition and Subtraction with Reasoning

### INVERSE OPERATIONS, ESTIMATING AND CHECKING ANSWERS

	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	estimate the answer to a calculation and use inverse operations to check answers	estimate and use inverse operations to check answers to a calculation	use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.
<p><b>Making an estimate</b></p> <p>Pick (from a selection of number sentences) the ones where the answer is 8 or 9.</p> <p><b>Is it true that?</b></p> <p>Is it true that <math>3+4 = 4 + 3</math>?</p>	<p><b>Making an estimate</b></p> <p>Which of these number sentences have the answer that is between 50 and 60</p> <p><math>74 - 13</math> <math>55 + 17</math> <math>87 - 34</math></p> <p><b>Always, sometimes, never</b></p> <p>Is it always, sometimes or never true that if you add three numbers less than 10 the answer will be an odd number</p>	<p><b>Making an estimate</b></p> <p>Which of these number sentences have the answer that is between 50 and 60</p> <p><math>174 - 119</math> <math>333 - 276</math> <math>932 - 871</math></p> <p><b>Always, sometimes, never</b></p> <p>Is it always, sometimes or never true that if you subtract a multiple of 10 from any number the units digit of that number stays the same.</p> <p>Is it always, sometimes or never true that when you add two numbers together you will get an even number</p>	<p><b>Making an estimate</b></p> <p>Which of these number sentences have the answer that is between 550 and 600</p> <p><math>1174 - 611</math> <math>3330 - 2779</math> <math>9326 - 8777</math></p> <p><b>Always, sometimes, never</b></p> <p>Is it always sometimes or never true that the difference between two odd numbers is odd.</p>	<p><b>Making an estimate</b></p> <p>Which of these number sentences have the answer that is between 0.5 and 0.6</p> <p><math>11.74 - 11.18</math> <math>33.3 - 32.71</math></p> <p><b>Always, sometimes, never</b></p> <p>Is it always, sometimes or never true that the sum of four even numbers is divisible by 4.</p>	<p><b>Making an estimate</b></p> <p>Circle the number that is the best estimate to <math>932.6 - 931.05</math></p> <p>1.3 1.5 1.7 1.9</p> <p><b>Always, sometimes, never</b></p> <p>Is it always, sometimes or never true that the sum of two consecutive triangular numbers is a square number</p>

# Number: Addition and Subtraction with Reasoning

PROBLEM SOLVING					
solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$	solve problems with addition and subtraction: <ul style="list-style-type: none"><li>* using concrete objects and pictorial representations, including those involving numbers, quantities and measures</li><li>* applying their increasing knowledge of mental and written methods</li></ul>	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction	solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why
	<i>solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change (copied from Measurement)</i>				Solve problems involving addition, subtraction, multiplication and division
	<i>Gold bars problem.</i>
